Regional Species Conservation Assessments
Kangaroo Island NRM Region
Complete Dataset for Fauna Assessments Nov 2013
Species listed per Class (Mammalia, Aves, Reptilia, Amphibia, Osteichthyes, Insecta)

COMMON NAME	Comments Kangaroosland
Platypus	Introduced to KI; Robert Ellis surveys every 2nd year; this is the only viable pop in SA; need clear water; all around Rocky River; valuable pop that is conservation significant
Short-beaked Echidna	Peggy Rismiller: continuing decline, ~ 30% in 75yrs (3 generations). Threats = cats, pigs, road mortality. Low reproductive rate
Spotted-tailed Quoll (Tiger Quoll)	regionally extinct; subfossil record only in Kelly Hill Caves
Kangaroo Island Dunnart	J Gates studied in 1999/2000 - not much trapping success; impact of recent fires unknown
Southern Brown Bandicoot (SA mainland & KI ssp)	No evidence for decline, but no recent monitoring; recent records over whole island; widespread
Koala	Introduced for conservation; managed decline on KI
Western Pygmy-possum	Many records
Little Pygmy-possum	only on western end of KI, no evidence of decline
Common Brushtail Possum	
Tammar Wallaby	Live on urban edge; 300 metres into scrub can not find. Highest level of destruction permits, culling program in place
Western Grey Kangaroo	under-recorded
Heath Mouse	only known from 1 location
Bush Rat	
Swamp Rat	naturally rare
White-striped Free-tailed Bat	key roosting habitat; large tree hollows; probably Least Concern
Southern Free-tailed Bat	needs more survey work
Gould's Wattled Bat	needs more survey work
Chocolate Wattled Bat	under-recorded; consistent reports from Kelly Hill Cave, 50 seen roosting
Lesser Long-eared Bat	under-recorded; very abundant
Large Forest Bat	probably only on western side; needs more survey work
Southern Forest Bat	under-recorded
Little Forest Bat	(no records) probably occurs here; needs more survey work
New Zealand Fur Seal (Australasian Fur Seal)	All breeding sites on KI
Australian Fur Seal (Brown Fur Seal)	a few breeding records here
Subantarctic Fur-seal	not breeding on KI
Australian Sea Lion	key breeding colonies here, inc Pages Is's & Dangerous Reef (& West Coast); has not recovered like other hunted seals/sea lions
Southern Elephant Seal	some dead, some alive; 1 juvenile has kept returning for ~10yrs
Kangaroo Island Emu	Extinct. Add records from Bauldin in 1830's - 30 birds noted around Penneshaw
Stubble Quail	breed most years spring/summer; common on farmland & low coastal heath; numbers fluctuate
Brown Quail	(no records) recently found near Kingscote; few old records previously 1959 Wheeler, Shulz Murray Lagoon 1944. Nature of bird comes and goes.
Collared Sparrowhawk	
Brown Goshawk	Definitely uncommon.
Wedge-tailed Eagle	resident pop.; doing well
Swamp Harrier	small pop; a few resident pairs; use wetlands which are becoming more saline through farming
Spotted Harrier	recent record from Penneshaw; perhaps 10 records in total; regular visitor; depends on seasonal conditions
Black-shouldered Kite	Definitely increased on island last 20 years. Adapted well to farmland.
White-bellied Sea-Eagle	Influence from Fleurieu will not make difference to recovery. Terry Dennis has studied - decline in breeding success over 20 years. 17 occupied territories (less than 50 birds). Pressure from tourism , poor planning.
Osprey	Breeding resident; will nest on artificial platforms; 8 breeding pairs along south coast; influence from mainland negligible.
Brown Falcon	influenced from mainland; small resident breeding pop; increased over last 20 yrs
Nankeen Kestrel	Common breeding resident.
Australian Hobby	
Peregrine Falcon	Concern for them as a coastal nesting species under increasing pressure.
Bush Stonecurlew	GCarpenter: NT appropriate given small popl on KI and status of species elsewhere in southern Aust; Jody Gates has studied; not huge pops but doing well
Masked Lapwing	
Banded Lapwing	Lot more records than indicated; lives in discreet pockets on well drained elevated paddocks
Painted Buttonquail	Observations over 40 years by Chris decline due to cats and fire. Found in mallee.
Common Bronzewing	common; benefited from agriculture
Brush Bronzewing	has suffered from habitat destruction; stable now
Sulphur-crested Cockatoo	small pop left on n/w coast, ~ <100 birds; not introduced; could have been killed by farmers; no influence from mainland - occasional vagrant
Little Corella	increased over last 30 yrs; not popular with locals
Yellow-tailed Black Cockatoo	resident breeding pop; flocks of up to 100/200 birds; feed on Monterey Pine; could be VU D1
Glossy Black-Cockatoo (Kangaroo Island ssp)	(no records) single population on northern half of KI; current pop ~ 350-400 birds; conservation dependent; increasing based on # fledglings
Galah	
Purple-crowned Lorikeet	

Regional Species Conservation Assessments
Kangaroo Island NRM Region
Complete Dataset for Fauna Assessments Nov 2013
Species listed per Class (Mammalia, Aves, Reptilia, Amphibia, Osteichthyes, Insecta)

COMMON NAME	Comments Kangaroosland
Little Lorikeet	1 old record; regionally extinct; could have been a vagrant
Elegant Parrot	regular post breeding visitor Jan - July; used to see flocks of 100 birds
Rock Parrot	never seen breeding on KI; regular post breeding visitor Jan - July; flocks of ~60 seen
Crimson Rosella	
Rainbow Lorikeet	
Fan-tailed Cuckoo	mostly visitors; comes in to breed in summer
Horsfield's Bronze Cuckoo	visitor spring/summer; some resident; likes mallee
Shining Bronze Cuckoo	GCarpenter: NT appropriate given small popl on KI and consistent with MLR; visitor spring/summer; woodland bird
Southern Boobook	common, breeding bird
Eastern Barn Owl	common breeding bird
Australian Owlet-nightjar	very sparse pop; western end of KI
Fork-tailed Swift	should be more records; migratory; visits KI in summer
White-throated Needletail	migratory spp; C Baxter not seen since 1990's; used to see flocks of 100+
Sacred Kingfisher	has always been Rare; regular spring/summer visitor; no obvious trend noted
Rainbow Bee-eater	irregular visitors; Kelly Hill CP; only a few pairs
Superb Fairywren	
Southern Emu-wren (Kangaroo Island ssp)	GCarpenter: Rare d(i) given limited distribution, & consistent with other SA popls; good habitat in coastal heath; in Flinders Chase NP; impacted by large fires (need to combine with Southern Emu-wren records)
Striated Thornbill	
Brown Thornbill	
Shy Heathwren	GCarpenter: Rare d(i) given limited distribution; large fires major threat
White-browed Scrubwren	likes dense cover
Spotted Pardalote	likes tall woodland & mallee
Striated Pardalote	
Eastern Spinebill	
Red Wattlebird	very common
Little Wattlebird	historical habitat is gone; core habitat: cup gum, banksia, stringybark; quality of habitat deteriorating
Regent Honeyeater	could have been vagrant
White-fronted Chat	common
Tawny-crowned Honeyeater	GCarpenter: NT given status of other SA popls.; in coastal heath over whole KI
Purple-gaped Honeyeater	signature bird of coastal mallee; common
Brown-headed Honeyeater	
White-naped Honeyeater	Cygnat River stronghold; breeding resident; no change in last 20yrs; restricted distribution; GCarpenter recommended RA
White-eared Honeyeater	GCarpenter: NT given limited distribution; common in sugar gum & stringybark
New Holland Honeyeater	
Crescent Honeyeater	
Western Whipbird (Kangaroo Island ssp)	good habitat on south coast; fires a threat; probably stable
Black-faced Cuckooshrike	spring/summer visitor
Grey Shrike-thrush	
Golden Whistler	
Dusky Woodswallow	
Australian Magpie	
Grey Currawong	
Grey Fantail	
Willie Wagtail	have increased in last 30yrs
Australian Raven	have suffered from habitat destruction
Little Raven	exist on western end of KI; G Carpenter: probable increase
Magpie-lark	
Restless Flycatcher	
Scarlet Robin	G Carpenter: Recommend NT given status of other SA popls.
Horsfield's Bush Lark	small pop around Emu Bay, Kingscote; spring/summer; should be more records; G Carpenter: RA d(i) given limited distribution
Australian Reed Warbler	spring/summer visitor to brackish Paperbark lagoons/swamps; in Murray Lagoon
Little Grassbird	restricted distribution in samphire area.; G Carpenter recommends NT in line with Reed Warbler
Silvereye	plenty of habitat
Welcome Swallow	

Regional Species Conservation Assessments
Kangaroo Island NRM Region
Complete Dataset for Fauna Assessments Nov 2013
Species listed per Class (Mammalia, Aves, Reptilia, Amphibia, Osteichthyes, Insecta)

COMMON NAME	Comments Kangaroosland
Fairy Martin	migratory
Tree Martin	resident
Bassian Thrush	likes wet areas, mallee ti-tree; fires, feral cats - threats
Red-browed Finch	common
Beautiful Firetail	widespread & in good numbers in Flinders Chase
Australian Pipit	
Chestnut Teal	KI good refuge; always birds here with fluxes from mainland
Grey Teal	
Australasian Shoveler	numbers fluctuate; salinity a threat; like natural shallow wetlands; breed on KI; G Carpenter: RA c(i,ii) given small breeding popl
Pacific Black Duck	don't see many mallards here
Hardhead	not breeding on KI
Musk Duck	resident breeders; occupies wetlands all over KI, also lives in sheltered coves
Cape Barren Goose	introduced, however could have been here before; up to 100 pairs in Flinders Chase in 1970's/80's, now <20 pairs in FC; G Carpenter recommended RA given small popl
Australian Wood Duck	G Carpenter: possibly increasing; like agriculture
Black Swan	
Pink-eared Duck	100's on paperbark lagoons; should be more records
Blue-billed Duck	should be more records; seen in flocks of 100's
Freckled Duck	Irregular visitor. Important refuge found at KI; sometimes turns up in large numbers
Australian Shelduck	Adapt well to agriculture.
Little Penguin	Visitor Centre at Kingscote, Penneshaw closed; definite decline; NZ Fur Seals could be a problem; contact Martine/Robin M; possibly escalate to CR based on A2 (80%)/
White-faced Storm Petrel	on Nobby Is; restricted area of occupancy
Short-tailed Shearwater	have no breeding records since 1992; very rarely breed here; not important habitat; irregular visitor
Hoary-headed Grebe	
Australasian Grebe	
Australian Pelican	only breeds on Buzzby Is near Kingscote; used to breed in Pelican Lagoon
Great Egret	Not vagrant anymore. Seems to have established itself on KI.
Cattle Egret	Winter visitor. Not known to breed here
Little Egret	on tidal flats; increased on KI in last 30yrs, started to breed here. Probable increase supported by G Carpenter
White-faced Heron	
Eastern Reef Egret	attempts at breeding have been recorded
Nankeen Night Heron	roost in pine trees in Ante Chamber Bay & American River; small pop.; have declined in one spot
Yellow-billed Spoonbill	breed on water courses in small numbers; very restricted - lower Cygnet R; increased over last 30 yrs
Royal Spoonbill	Breed on Buzzby Is Bay of shoals. Have increased in numbers to match Yellow-billed Sponnbill.
Australian White Ibis	increased breeding habitat
Straw-necked Ibis	Also breeding first time Buzzby Is. Cygnet River Kingscote increasing. Some visitors, some residents
Australasian Darter	more sightings than recorded. Irregular visitors.
Little Pied Cormorant	breeds in swamps/wetlands
Great Cormorant	Resident. Does breed but not well documented.
Black-faced Cormorant	Breed in big numbers therefore critical breeding areas are important to conserve - Buzzby Is
Little Black Cormorant	only a few discrete breeding records. Does not breed on Buzzby Is.
Pied Cormorant	
Eurasian Coot	
Dusky Moorhen	uncommon on KI; breeds in specific locations; likes sedges/swamps/cover
Buff-banded Rail	(no records) have been noted breeding at American R; irregular visitor
Lewin's Rail	very rare on KI; no breeding recors; cryptic bird
Purple Swamphen	should be more records
Australian Spotted Crake	established in samphire in Cygnet River & Buzzby Is; breeding residents & visitors; should be more records
Baillon's Crake	Very little known about it. Spotted in freshwater lagoons. Cape Willoughby lighthouse 7 birds found dead. Extremely rare bird. Irregular visitor.
Spotless Crake	very poorly known
Black-tailed Nativehen	
Sooty Oystercatcher	can be 100's of birds on tidal flats at Kingscote; impacted by humans, dogs
Australian Pied Oystercatcher	beach nesting bird; threatened by vehicles, dogs, etc.
Banded Stilt	do not breed on KI; breed on salt lakes/lagoons central Australia; regular visitor; boom & bust spp.
Black-winged Stilt	moderately common breeding resident; sometimes more than 3,000

Regional Species Conservation Assessments
Kangaroo Island NRM Region
Complete Dataset for Fauna Assessments Nov 2013
Species listed per Class (Mammalia, Aves, Reptilia, Amphibia, Osteichthyes, Insecta)

COMMON NAME	Comments Kangaroosland
Red-necked Avocet	Breed and resident BUT uncommon
Double-banded Plover	regular Autumn/Winter visitor from NZ; non-breeding; in 2013 flock of 37 seen on brackish samphire swamp near Kingscote
Red-capped Plover	
Black-fronted Dotterel	not common; breeding resident
Red-kneed Dotterel	resident; in small numbers
Pacific Golden Plover	Northern Hemisphere migrant; definite decline; not seen very often
Grey Plover	More common than records suggest; mostly on NE coast; consistent numbers
Hooded Plover	220 birds counted in 2012
Common Sandpiper	regular non-breeding visitor; solitary; difficult to find; turns up on rocky coastline/estuaries; generally same numbers
Ruddy Turnstone	D'Estrees Bay used to see 100+ birds now only a hand full
Sharp-tailed Sandpiper	number go up & down, but less than there used to be
Sanderling	migratory wader, unpredictable; should be a more records from south coast
Red Knot	Migratory. Reasonably regular but very few (<50) on island at one time
Curlew Sandpiper	Use to be common. Definitely declined
Pectoral Sandpiper	migratory; summer visitor; only a handful on KI at any 1 time
Red-necked Stint	Use to be more common; migratory wader
Long-toed Stint	poorly observed bird; irregular visitor; migratory wader; very rare; should be few more records
Great Knot	(no records)
Latham's Snipe	Mostly freshwater sedge lagoons. Very restrictive habitat. Northern Hemisphere non-breeding migrant
Bar-tailed Godwit	restricted distribution; seen every year in small numbers
Far Eastern Curlew	used to see 7-8 in American R, now not many at all
Whimbrel	Northern Hemisphere migrant
Grey-tailed Tattler	definite decline; only a few ever seen
Wood Sandpiper	known on eastern end on Murray's Lagoon (C Baxter saw around 35 in one year); should have more records
Common Greenshank	
Whiskered Tern	should be more records; likes brackish paperbark lagoons
Caspian Tern	Resident and breeds (Buzzy Is) BUT always in low numbers
Fairy Tern	very scarce; used to breed on islands off Flinders Chase
Greater Crested Tern	
Silver Gull	
Pacific Gull	
Tawny Dragon	require rocky substrate to live on; limited to west coast; no recent records but lots of sightings
Marbled Gecko	more recent records needed
Barking Gecko	common and widespread, easy to find
Lined Worm-lizard	likes cool, damp areas; common, widespread
Eastern Three-lined Skink	likes woodland, grassland
Three-toed Earless Skink	only in northern half of KI
Four-toed Earless Skink	widespread & common
Garden Skink	very common
Bougainville's Skink	very common
Southern Four-toed Slider	sandy coastal distribution
Bull Skink	found in burrows and coastal sand
White's Skink	widespread; successful
Dwarf Skink	mainly in northern areas
Mallee Snake-eye	under sampled
Southern Grass Skink	very uncommon, hard to find; on western end, probably more records
Heath Goanna	definite decline based on roadkill info over last 20yrs - Peggy Rismiller
Pygmy Copperhead	secure, widespread
Eastern Tiger Snake	not many recent records
Brown Tree Frog	
Common Froglet	
Banjo Frog	in suburban gardens & drains
Spotted Marsh Frog	
Burrowing frog	sandy soil preference; explosive and early season breeders; susceptible to chytrid fungus

Regional Species Conservation Assessments
Kangaroo Island NRM Region
Complete Dataset for Fauna Assessments Nov 2013
Species listed per Class (Mammalia, Aves, Reptilia, Amphibia, Osteichthyes, Insecta)

COMMON NAME	Comments Kangaroosland
Brown Toadlet	status unknown, chytrid fungus presence unknown; surveys needed
Pouched Lamprey	some sampling but not much on KI; one fairly recent record in marron net west side of KI; needs more sampling
Short-finned Eel	Lots of sampling in systems; should turn up
Smallmouth Hardyhead	
River Blackfish	only 1 record from 1987; needs more searching
Swan River Goby	occurs across island
Lagoon goby	2005 most recent record; restricted area of occupancy
Climbing Galaxias	
Common Jollytail	Most common species caught
Mountain Galaxias	presumed extinct if good record
Green Carpenter Bee	No records in database; independent scientists currently surveying, contact Richard Glatz; to date found on far western area of island. 2007 bushfires wiped out around 70% of pop; only 1 pop known on KI; 1 mature female adult per nest; expect ~250; large fires main threat; rely on banksia and xanthorrhoea; plans to translocate nests on KI
